PROFESSIONAL SUMMARY

Results-driven Full Stack Developer and Computer Science graduate with 2 years of hands-on experience building scalable web applications, backend services, and automated workflows. Proficient in modern backend technologies (Node.js, Express, Python, FastAPI) and frontend frameworks (React, Next.js, TypeScript). Experienced in designing optimized SQL databases, integrating RESTful APIs with third-party platforms (Stripe, Google Maps), and translating complex business requirements into high-performance software solutions. Eager to contribute technical expertise, problem-solving skills, and application ownership to Ronin's digital transformation initiatives.

CORE COMPETENCIES & TECHNICAL SKILLS

- **Full-Stack Web Development:** Node.js, Express, React, Next.js, TypeScript/JavaScript, HTML5/CSS3, Tailwind CSS, RESTful APIs
- **Backend & Database Infrastructure:** SQL Databases (PostgreSQL, MySQL, Supabase, Drizzle ORM), Database Design & Query Optimization, Python, FastAPI, Microservices
- **Architecture & Principles:** Object-Oriented Programming (OOP), SOLID Principles, Design Patterns, Reusable & Maintainable Code Standards
- **Software Lifecycle & Tools:** Git/GitHub, Automated Testing, Software QA, Deployment, Version Control, Troubleshooting, Docker, Postman.

EXPERIENCE

Full-Stack Software & AI Developer (Client & Project-Based) (Remote) | *Nov 2025 – Present*

- Engineered production-grade web applications and business solutions, handling requirements gathering, database architecture (PostgreSQL/MySQL), and third-party API integrations (Stripe, Google Maps).
- Designed and executed software testing, bug tracking, and UAT protocols to ensure system reliability and seamless performance across all deployments.
- Managed project trackers, technical documentation, and delivery timelines for commercial web platforms like Vexa Chauffeurs and Velocity Prop.

Web Development Intern — Verior CodeLabs, Hyderabad | *Jul 2025 – Aug 2025*

- Assisted with full-stack web development tasks, building responsive user interfaces and backend database features under Agile development workflows.
- Collaborated with senior developers to troubleshoot application issues, test APIs, and ensure security and performance optimization across client systems.

FEATURED PROJECTS

Vexa Chauffeurs — Luxury Executive Transport Platform (*Sep 2026*)

- Developed and deployed a full-stack luxury car booking platform featuring real-time route calculation and distance matrix pricing via Google Maps APIs.
- Integrated secure Stripe payment webhooks, international phone validation, and automated SMTP notifications backed by a MySQL database using Drizzle ORM.
- **Tech:** React 19, TypeScript, Node.js, Express, MySQL, Drizzle ORM, Stripe API, Google Maps API

RAG-Powered Knowledge Retrieval Engine (*Jul 2026*) | GitHub

- Built an end-to-end Retrieval-Augmented Generation (RAG) system utilizing LangChain and FastAPI to enable high-precision semantic search across unstructured document repositories.
- Implemented semantic chunking and metadata indexing using ChromaDB and FAISS vector databases, significantly reducing hallucination rates and query latency.
- **Tech:** Python, LangChain, ChromaDB, FAISS, OpenAI API, FastAPI, Vector Search

Multimodal AI Stock Predictor (Final Year Project) (*Aug 2025 – May 2026*) | GitHub

- Architected an ensemble multimodal prediction system fusing LSTM time-series forecasting, CNN chart pattern recognition, and FinBERT NLP sentiment analysis.
- Engineered feature extraction pipelines across 32 data streams, tuning hyperparameters to achieve 85%+ predictive accuracy for automated financial analysis.
- **Tech:** Python, PyTorch, FinBERT, Scikit-learn, LSTM, CNN, Pandas, FastAPI

Online Doctor Appointment System (*Apr 2026*) | GitHub

- Developed a full-stack MERN web application featuring user authentication, role-based access control (RBAC), and real-time scheduling workflows.
- Designed scalable REST APIs in Node.js/Express and structured database models to streamline medical booking and administrative management.
- **Tech:** React, Node.js, Express, MongoDB, Tailwind CSS, JavaScript (ES6+)

Velocity Prop — Proprietary Trading & Analytics Platform (*Nov 2025***)**

- Developed a high-performance web dashboard to track live market data, evaluate trading rules, and log financial transactions securely.
- Built modular backend services and RESTful APIs with Node.js/Express, ensuring fast data processing, reliable state synchronization, and database query optimization.
- **Tech:** React, TypeScript, Node.js, Express, PostgreSQL, REST APIs, Tailwind CSS

EDUCATION

Bachelor of Science in Computer Science

Sukkur Institute of Business Administration (IBA), Sukkur, Pakistan | *Sep 2022 – May 2026*

CERTIFICATIONS

- **Google AI Professional Certificate** – Coursera *(2026)*
- **Generative AI Fundamentals with Google Cloud** – Udacity *(2026)*
- **Google Prompting Essentials** – Coursera *(2025)*
- **Complete Python Course: Beginner to Advanced** – Udemy *(2025)*
- **Introduction to MongoDB** – MongoDB *(2025)*
